Summary

Data analytics enthusiast with experience in Python, machine learning, and backend development using Flask. Skilled in data cleaning, visualization, and deriving actionable insights. Seeking a data analytics internship to contribute to data-driven solutions.

Education

B.Tech in Computer Science Engineering *Aug 2026 (Expected)*
Jodhpur Institute of Engineering and Technology, Jodhpur, Rajasthan, India
CGPA: 7.7 / 10

Skills

- **Programming:** Python, SQL, Pandas, NumPy
- **Analytics & Visualization:** Excel, Matplotlib, Seaborn, Power BI
- **Machine Learning:** Scikit-learn, Regression, Classification, Clustering
- **Backend Development:** Flask
- **Tools:** Jupyter Notebook, Git, MongoDB, VS Code

Projects

Sales Dashboard for Blinkit *Power BI, Excel, SQL*

- Developed an interactive dashboard to monitor Blinkit's sales KPIs.
- Visualized revenue trends, top-performing products, and regional growth.
- Enabled dynamic filtering and slicing for real-time decision-making.

Sentiment Analysis on Social Media Data *Python, Scikit-learn, Pandas, NLTK, Seaborn*

- Built an end-to-end ML pipeline to classify social media sentiments.
- Preprocessed text data and applied feature engineering techniques.
- Achieved 85% accuracy using Logistic Regression and Random Forest.

Social Media Analytics with SQL *MySQL, Excel*

- Queried large-scale activity data to uncover user behavior patterns.
- Transformed raw data into structured reports for Excel dashboards.

Internship Experience

Machine Learning & Data Analytics Intern *May 2024 – Jun 2024*
Engineercore – Remote

- Assisted in cleaning and preprocessing datasets using Pandas and NumPy.
- Developed and trained machine learning models using Scikit-learn.
- Collaborated on data visualization dashboards using Matplotlib and Seaborn.
